### Letter of Recommendation

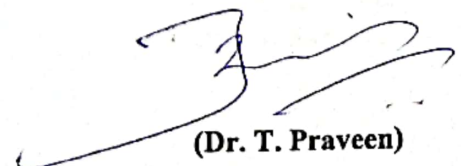

We are very proud to introduce you to **Mr. SIVA KUMAR**. I have known him for two years as a professor in computer science and engineering. He is at the forefront of the department's activities and I had an opportunity to teach him "**Software Engineering**".

As a student, he is a very hard-working person, has a good understanding of things, has a complete understanding of the basics, applies these concepts to more difficult problems, and shows great expectations and integrity. ..I got to know him well in the last three years of getting his bachelor's degree at our university.

Overall, he has a charismatic personality and is fluent in both written and verbal English. He is an excellent student and may be good at his graduate studies. Apart from regular academics, he has good leadership qualities.

His self-discipline, technical inclination, optimistic approach and mature outlook hold him in good stead for pursuing a course which requires a lot of hard work and dedication. Being a witness to this kind of dedication I undoubtedly rate his potential to excel in postgraduate studies with an inquisitive frame of mind.

I'm sure he's very suitable for graduating from your college. By offering him a graduate program at your university, it not only provides him with the opportunity to grow professionally, but also helps him peak his performance. Therefore, I highly recommend Shiva Kumar for further study at your prestigious university and support him for tuition waivers or other forms of support.
